

# Wale Adebayo

Richmond, VA | (240) 705-2487 | Ade.adebayod@gmail.com

## Professional Summary

Experienced and highly skilled Oracle Database Administrator (DBA) with 8+ years of success designing, deploying, and managing complex database environments. Specialized in Oracle Grid Infrastructure, ASM, RAC, RMAN, and Data Guard across Unix, Linux, Windows, and macOS Server platforms. Proven track record of delivering high availability, performance tuning, secure environments, and disaster recovery solutions. Adept at automating tasks, collaborating across teams, and optimizing data architecture to drive business continuity and scalability.

## Core Competencies

- Oracle RAC & ASM Configuration
- RMAN Backup & Recovery Automation
- Data Migration & Database Upgrades
- SQL & PL/SQL Tuning & Troubleshooting
- High Availability & Disaster Recovery
- FileMaker Pro Development & Admin
- OEM 12c Cloud Control Monitoring
- Cross-Platform OS Management (Unix/Linux/Windows/macOS)

## Technical Skills

- Databases: Oracle (10g, 11g, 12c), SQL Server, FileMaker Pro (16-19)
- HA/DR Technologies: RAC, ASM, RMAN, Data Guard, GoldenGate
- Tools & Utilities: OEM 12c/11g, SQL Developer, PL/SQL Developer, DataPump, SQL\*Plus
- Operating Systems: Unix (AIX/Solaris), Linux (RedHat/CentOS), Windows Server, macOS
- Specialties: Performance Tuning, Data Security, Capacity Planning, Automation

## Key Projects & Achievements

- Designed and implemented enterprise-grade disaster recovery and high availability solutions using Oracle RAC, ASM, and Data Guard.
- Optimized production systems through SQL/PLSQL tuning, AWR analysis, and space management strategies.

- Automated full/incremental backups using RMAN and enhanced refresh processes with DataPump scripting.
- Migrated legacy systems to Oracle 12c ASM and FileMaker 19, reducing risk and improving data performance.
- Engineered and supported FileMaker databases for VDOT, delivering operational and metric-reporting platforms.
- Supported statewide mobile device management (MDM) infrastructure and policy enforcement platforms.

## **Professional Experience**

Statewide DBA - Virginia Department of Transportation (TOC-SSP Project)

Metafora Consulting Inc - Richmond, VA | 2023 - Present

- Lead DBA for Oracle and FileMaker environments, ensuring secure and compliant database operations.
- Manage Oracle Grid Infrastructure on Linux servers; conduct patching, upgrades, and backup configuration.
- Perform performance tuning using OEM 12c, AWR, and ASH reports; support MDM systems and integration.

Statewide DBA - Virginia Department of Transportation (TOC-SSP Project)

TranSmart Inc - Richmond, VA | 2018 - 2023

- Migrated FileMaker 16 to 19; integrated with Oracle databases to centralize reporting for statewide operations.
- Built backup/recovery workflows using RMAN, configured job automation and FileMaker Server on macOS.
- Tuned SQL and PL/SQL queries, conducted system health checks, and implemented proactive monitoring.
- Developed dashboards and analytics to improve safety and performance metrics for traffic operations.

Oracle DBA

Chaveran Inc - Bowie, MD | 2016 - 2018

- Migrated Oracle 11g (FS) to 12c ASM; deployed OEM Cloud Control 12c, improved visibility across environments.

- Installed and configured Oracle RAC 11.2.0.3 with ASM, improved failover and load balancing.
- Automated RMAN backups, created retention policies, and deployed TDE using Oracle Wallet.
- Partnered with developers to optimize SQL queries, conduct performance testing, and ensure compliance with OFA standards.
